

NEARLY NEW

3D DIGITALIZER

TECHNICAL FEATURES

Scanning tool suitable for both large and small objects.

Whether it is a person or a fashion accessory, it will automatically optimize its settings in order to make the output easy to use and simple to process.

It is able to automatically recognize the object even if placed on a particularly complex background and to acquire the color.

The scans are processed in a few seconds and then modified as needed, ready to be sent directly to the 3D printer
